I build reusable Nuxt/Vue tools with a focus on accessibility, reliability and maintainability. Founder of the open-source organisation Modulane. Open to freelance and full-time roles, starting now.

PUBLIC EXPERIENCE

Founder & Lead Developer · Modulane

Oct 2026 – present

Created and published developer tools: a project-script CLI and a modular Nuxt 4 foundation.

dev-workspace-cli v0.11.0

An interactive CLI for browsing development projects and running their scripts with npm, pnpm, Yarn or Bun.

nuxt-core v0.9.1

A reusable foundation for building modern websites with Nuxt.

Also

workflows · repo-template · repo-check · configs · ai-disclosure, all on github.com/modulane

SKILLS

Frontend
Nuxt 4 layers, Vue 3, strict TypeScript, SCSS, modern CSS, design tokens, theming

Backend
Nitro server routes, cached API aggregation, rate limits, SMTP, server-side validation

Accessibility
ARIA, WCAG AA contrast, forced colours, reduced motion, right-to-left

Node.js & CLI tools
Interactive terminal UIs, cross-platform tools, package-manager detection, GitHub Actions

Testing
Vitest, Node test runner, enforced coverage

CI/CD & releases
GitHub Actions, semantic-release, monorepo releases, npm trusted publishing

Security & supply chain
Hardened workflows, zizmor, Dependabot, fork-safe checks

Tooling & standards
Shared ESLint and Prettier configs, Yarn 4, repository standards

Open-source maintenance
Documentation, roadmaps, community files, technical writing
